Dear Potential Volunteer,

Thank you for your interest in volunteering for Southern Delaware Therapeutic Riding (SDTR). SDTR was founded in 1988, and since then our mission has been to improve the physical and emotional well-being of children and adults with disabilities through equine assisted therapy. By riding in our program, participants will experience improved social and emotional skills; increased body strength, flexibility, and coordination; and greater confidence and self-esteem.

SDTR and its instructors are certified by the Professional Association of Therapeutic Horsemanship (PATH), a non-profit organization who is internationally recognized as the top credentialing and accrediting entity for therapeutic riding facilities and their instructors. We are the only PATH certified riding facility in Sussex and Kent counties.

Like all non-profit organizations, our success depends not only on the financial contributions from our community, but also the hard work and time given by our selfless volunteers. There are many ways in which you can help our program, and include...

- ❖ Assisting with our lesson program, as either a horse leader or sidewalker
- ❖ Assisting with farm maintenance and construction
- ❖ Assisting with fundraising and events
- ❖ Assisting with community outreach, marketing, graphic design, IT work, and grant writing
- ❖ Assisting with administrative duties

To begin the process of becoming a volunteer, we ask that you complete the attached application and registration form and include all required documents. Upon completion, you may mail the forms to the address listed above. Once we have received everything in full, we will be in touch with you regarding the next steps of the volunteering process.

Again, thank you for your interest in SDTR. We look forward to hearing from you!

Sincerely,

SDTR's Volunteer Team

There are numerous obvious and non-obvious inherent risks always present in such activity despite all safety precautions. According to NEISS (National Electronic Injury Surveillance Systems of United States Consumer Products) horse activities rank approximately 64th among the activities of people, relative to injuries that result in a stay at U.S. hospitals. Related injuries can be severe requiring more hospital days and resulting in more lasting residual effects than injuries in other activities. **NO HORSE IS A COMPLETELY SAFE HORSE.** Horses are 5-15 times larger, 20 to 40 times more powerful and 3 to 4 times faster than a human is. If a rider falls from a horse to the ground it will generally be at a distance of from 3 ½ to 5 ½ feet and the impact may result in injury or death of rider. Horseback riding is the only sport where one much smaller, weaker, predator animal, the human tries to control and become one unit of movement with another much larger, stronger prey animal, the horse, with each having limited understanding of each other. If a horse is frightened or provoked it may divert from its training and respond according to its natural survival instincts which may include but are not limited to: stopping short, changing directions or speed at will, shifting its weight side to side, bucking, rearing, biting, kicking or running from perceived danger.
